# TRADE LIST

OF SELECT

# FLOWER SEEDS

August Rölker & Sons

NEW YORK

# ALL OUR SEEDS

## Are Offered Subject to the following Clause :

As the failure of seeds to germinate may result from causes that the utmost care of the most experienced cultivators cannot control, **no warranty, expressed or implied**, in any respect, is assumed by us, and we will not be held in any way responsible for the crop. Purchasers not agreeing to accept seeds with this understanding must return them at once. All our seeds, however, have been carefully selected. We sell at the following

**TERMS** to approved accounts : **Net thirty days** from date of shipment, payable in New York funds. Accounts not settled by the end of the month in which they fall due are subject to our sight draft without further notice, but with **25 cents added** for exchange on New York. **Ten per cent. discount to the Trade** for prompt cash in **ten days** from date of invoice, on all orders above one dollar, except where prices are quoted **Net**. Remittances are applied first to overdue accounts before being entitled to the cash discount. We allow no cash discount on C. O. D. shipments, and shall send no goods C. O. D. unless a proportionate cash deposit accompanies the order. **All unknown correspondents** must furnish satisfactory references, or send cash with each order.

---

## HOW TO REMIT.

Buy at your bank a draft on New York, and have it drawn direct to the order of August Rölker & Sons, or buy a Post Office Money Order or Express Money Order.

**Cash must never travel in an unregistered letter.** When remitting postage stamps, place each layer between wax tissue paper, to prevent the backs from sticking together or to the letter.

**No charge** is made for **packing and shipping**, except on Freight orders below five dollars in value, when we charge 50 cts. for cartage.

Prices are subject to change without notice. This list cancels all former quotations.

---

Address all correspondence to

**AUGUST RÖLKER & SONS,**

January, 1896.

**P. O. Station E, NEW YORK.**

# General List of Flower Seeds by Weight.

To avoid delay, we request you to write your name very plainly, and always, no matter how often you write us, give your Post Office, County, State and Street in full.

We invariably charge postage extra, one cent per two ounces, or 8 cents per pound, and 8 cents per package for registering. Buyers assume mailing risks; express is the safer way to send goods. Special prepaid rates on seeds and bulbs are the same as mail rates, *limiting only the cost of any single package to ten cents.*

We charge less than one quarter ounce of any variety at packet rates, less than one quarter pound at ounce rates, except when otherwise stated.

No seed sold by weight for less than 10 cents. Each item will be invoiced in round amounts of fives and tens, not in fractions thereof.

1,000 assorted pots at 1,000 rates. Saucers to match pots, one-half price of pots.

**NEPONSET PAPER FLOWER POTS.**

**Manufactured Solely by F. W. BIRD & SON.**

From Their Celebrated Neponset Water-Proof Fabrics.

For shipping of plants in pots, with intact root balls, they have no equal. Used for plants in wall decorations, they are unsurpassed. Bulbs and all soft-wooded plants, which do not shun water, agree well with this pot.

Cabbage, Tomato and Strawberry plants have been grown with success in these pots. Paper pots retain the moisture in the soil longer than earthen pots.

We are agents for F. W. Bird & Son, and always carry a limited stock at our store. If pots are ordered to be shipped by freight, 50 cents cartage must be added for each shipment. The Neponset Pots are manufactured of waterproof paper, are unbreakable, handsome, light, cheap and terra cotta color.

**These pots come packed** in light crates of always even contents as stated hereafter.

**Prices are net spot cash**, delivered at Factory, **East Walpole, Mass.**, or from stock in **New York** (at our option). Less quantities than original crates are charged at 100 rates.

## INSECTICIDES.

### Dianite, or Virgin Sulphur, the Best Cure for Mildew on Roses.

Also for ordinary rust. Prominent growers around New York and Boston have used it for years with good success, and we recommend it to all rose growers.

Nurserymen will find Dianite a welcome acquisition, as it works with the same effect outdoors as under glass, killing likewise green and black fly. When combined with stable manure it heightens the fertilizing qualities by its calcareous ingredients, creates nitrogen, thereby killing all dormant insect life in such manure, and thoroughly cleansing it.

**DIRECTIONS.** For mildew outdoors, select a fine, calm day when the sun is well out and the dew is gone; apply with sulphur bellows. Three applications are generally sufficient. Under glass same rules apply. Do not apply whilst foliage is wet from watering, else the sulphur fastens thereon and spoils the appearance of plants.

The weight of this sulphur is so light that when blown into the air it will distribute like a fine cloud, and in settling reach the upper as well as the nether part of each leaf, thus combining with an easy application a radical cure.

We sell original bags of 100 ko. (220 lbs.) for . . . . . \$8 50 net.

" " 50 ko. (110 lbs.) " . . . . . 5 00 "

25-lb. packages for \$1.50; 10 lb. packages for 75 cents.

 Dianite is the crude sulphur in its virgin state as taken from the ground. Do not confound it with flowers of sulphur or brimstone.

### FIR-TREE OIL INSECTICIDE.

Acknowledged by all to be the best remedy for effectually destroying all kinds of pests to which plants are subject, such as *Red Spider, Scale, Fly, Thrip, Blight, Woolly Aphis, Ants, Grub, Worms, Caterpillars, etc.* Full directions go with each tin. To be diluted with from 20 to 100 parts of water.

**PRICE:** One-gallon tin, \$3.25; ten-gallon tin, \$30; one quart tin, \$1. Small tins, to retail for 40 cents, furnished to florists who wish to keep it on sale, for \$3.50 a dozen.

**TO JOBBERS.** Special terms for larger quantities. *We are the general depot.*

**KEROSENE EMULSION.** Use one pint of Fir-Tree Oil to one gallon of kerosene.

Work for a few minutes with an ordinary greenhouse syringe, and your emulsion is ready for diluting with water and immediate use.

**Hellebore.** White powdered . . . . . in 1-lb. boxes, per lb, \$0 35

## **BULBS and PLANTS**

### **to be Delivered in the Coming Fall.**

All such orders given before the first of May we fill at special low figures, below our regular Fall Catalogue rates, subject only to any changes in existing tariff rates of duty, and to contingencies beyond our control. The quality we warrant to be as good a prime average quality as each season produces. Purchases are made abroad personally by one of our firm, to insure good delivery. We, therefore, solicit again your timely orders for

**Roman Hyacinths, Paper White** and other **Narcissus, Freesias, Lilium candidum, longiflorum, Harrisii, Lily-of-the-Valley (Forcing Pips), Spiræa Clumps, Dutch Hyacinths, Tulips** and other **Bulbs.**

**Azalea indica Plants, Forcing Rhododendrons, Palms** and other **Decorative Plants, Hybrid Roses**, low budded and standard, etc., etc.

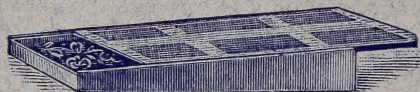

Prices and all further detail by special correspondence. Do not buy until you have received our offers.

---

☛ Please note that since February 1, 1895, we have had no further connection with the Plant Auction Business.

IN PLACE OF  
**Plant-Bed Cloth**

**Use Fenster Pappe.**

**WE ARE THE AMERICAN AGENTS.**

It is used as a covering for cold-pit sash, under which to grow strawberry plants, early vegetables, tobacco, etc. Excellent for shading in palm or fern houses, and a most handy article for protection against the direct rays of the sun, wherever shading is required; also for lawn-tents, awnings, poultry houses, and the like. It is not affected by the elements as parchment paper is; it does not shrink, and when properly put on and oiled should last several seasons, needing only re-oiling every summer. This is the verdict of German and Dutch growers and nurserymen. Comes in rolls about 39 inches wide and about 110 yards long.

Price per original roll, \$10 net cash, f. o. b. cars, N. Y.

Trial Roll of eight yards (enough for four sashes), for \$1 net.

**DIRECTIONS.**—Moisten and stretch FENSTER PAPPE taut and use batten in nailing on to sash. When dry, paint the rough surface thoroughly with boiled linseed oil until it shows a gloss. Let it become *thoroughly dry* before using, when it is claimed to do service for years. The application of the oil makes FENSTER PAPPE sufficiently translucent for plant life.

We recommend Fenster Pappe especially to our southern friends; they will find it very handy and useful.

---

**TESTIMONIAL.**

CHICAGO, *October 9, 1895.*

MESSRS. AUGUST RÖLKER & SONS, New York:

*Gentlemen*—I have used your Fenster Pappe over a year, and like it very much as an outside second roof for greenhouses and frames, where it is very serviceable in winter as a protection against the cold, and in summer against hail. It is the best shading medium for plants that require shading. I also use it to great advantage as covers for forcing beds of bulbs and lily-of-the-valley.

As an owner of a city greenhouse, I find it excellent as a safeguard against stones and other missiles thrown by careless boys and otherwise.

Yours truly,

H. SCHILLER.
